VOL. 113, Nos. 1–2 FLUID PHASE EQUILIBRIA DECEMBER 15 1995

CONTENTS

(*Abstracted/Indexed in: Curr. Contents/Eng. Technol. Appl. Sci. Curr. Contents/Phys. Chem. Earth Sci., Sci. Cit. Index, Phys. Abstr., ASCA*)

Theoretical papers

DISQUAC calculation of thermodynamic properties of ether + 1-alkanol systems. Comparison with UNIFAC calculation
S. Delcros, J.R. Quint, J.-P.E. Grolier and H.V. Kehiaian (Aubière, Paris, France) 1–19

Determination of partial molar volumes at critical end points
C.L. Patton and K.D. Luks (Tulsa, OK, USA) 21–26

An implicit type EOS–$G^{E(VP)}$ model employing vapor pressure standard state. I. Prediction of high-pressure vapor–liquid equilibria based on low temperature data
K. Kurihara and K. Kojima (Tokyo, Japan) 27–43

An implicit type EOS–$G^{E(VP)}$ model employing vapor pressure standard state. II. Prediction of excess enthalpy using the EOS–G^E model
K. Kurihara and K. Kojima (Tokyo, Japan) 45–60

Solution algorithms and parameter sensitivity analysis for the SPHCT equation of state
R.D. Shaver, R.L. Robinson, Jr. and K.A.M. Gasem (Stillwater, OK, USA) 61–77

Correlation and prediction of Henry constants for liquids and gases in five industrially important polymers using a CS-type correlation based on the van der Waals equation of state. Comparison with other predictive models
S. Bithas (Zographos, Greece), G.M. Kontogeorgis (Lyngby, Denmark), N. Kalospiros (Zographos, Greece), A. Fredenslund (Lyngby, Denmark) and D.P. Tassios (Zographos, Greece) 79–102

Improved phase boundary for one-component vapor–liquid equilibrium: incorporating critical behavior and cubic equations of state
D.H. Smith and M. Ferer (Morgantown, WV, USA) 103–115

Experimental papers

Solid–liquid equilibria in binary mixtures of organic compounds
A. Jakob, R. Joh, C. Rose and J. Gmehling (Oldenburg, Germany) 117–126

VLE for cryogenic methyl fluoride + nitrous oxide + xenon at 182.33 K
I.M.A. Fonseca and L.Q. Lobo (Coimbra, Portugal) 127–138

Excess volumes of binary systems formed by a 2,4,6-trimethylpyridine and n-alkane
T. Kasprzycka-Guttman (Warsaw, Poland) and E. Megiel (Pasteura, Poland) 139–149

Ternary diagram: alpha-(3-benzoylphenyl)-propionic acid (ketoprofen) in acetone–water mixtures at different temperatures. Experimental data and predicted results
F. Espitalier, B. Biscans, P. Sere Peyrigain and C. Laguérie (Toulouse, France) 151–171

Densities and excess volumes of cyclohexane + hexane between 298.15 K and 473.15 K
S.A. Beg, N.M. Tukur and D.K. Al-Harbi (Dhahran, Saudi Arabia) 173–184

Bubble points measurement for system chloroform–ethanol–benzene by inclined ebulliometer
H. Li, S. Han and Y. Teng (Hangzhou, China) 185–195
